

PROBLEM-SOLUTION FIT CANVAS

Project: INDIA'S AGRICULTURAL CROP PRODUCTION ANALYSIS

Define CS, fit into CC

CS → CC → AS

Explore AS, differentiate

1. CUSTOMER SEGMENT(S)

Who is your customer?

Farmers (Small, Marginal and Large)

Agricultural Researchers and Students

Government & Policy Makers

Agri Businesses, Traders and Investors

NGOs and Development Organizations

Focus on J&P, tap into BE, understand RC

2. JOBS-TO-BE-DONE / PROBLEMS

J&P RC BE

Which jobs-to-be-done (or problems) do you address for your customers?

There could be more than one; explore different sides.

- Analyze crop production trends across India by time, region and crop type.
- Identify top producing states, districts and seasonal patterns.
- Compare yield vs production and find gaps.
- Identify factors affecting crop production (e.g., area, rainfall, season).
- Provide data-driven insights to support better agricultural decisions and policies.
- Forecast future crop production for planning and resource management.

3. TRIGGERS

What triggers customers to act?

Need to improve crop productivity and farm income.

Uncertain weather and climate impact on crops.

Government initiatives and agricultural policies.

Market demand and price fluctuations.

Need for data-driven planning and decision making.

Identify strong TR & EM

4. EMOTIONS: BEFORE / AFTER

How do customers feel when they face a problem or a job and afterwards?
Use it in your communication strategy & design.

BEFORE (Problem Exists)

- Uncertainty about crop yield
- Difficulty in comparing regions and crops
- Lack of reliable data and insights
- Worry about losses and planning

AFTER (Problem Solved)

- Confident decision making
- Clear understanding of trends
- Better productivity and profit
- Data-driven and future-ready

EM

5. AVAILABLE SOLUTIONS

Which solutions are available to the customers when they face the problem or need to get the job done?
What have they tried in the past? What pros & cons do these solutions have?

Solution	Pros	Cons
Manual Record Keeping (Registers, Notebooks)	- Low cost - Easy to use	- Time consuming - Prone to errors - No analysis
Government Reports & Publications	- Reliable - Official data	- Not real-time - Hard to customize - Complex to analyze
Excel Sheets	- Flexible - Customizable	- Manual work - Error prone - Hard with large data
Online Portals (e.g., data.gov.in)	- Free access - Wide data	- Raw data only - No insights/visuals - Requires skill
Other Analytics Tools	- Advanced analysis - Visual reports	- Costly - Complex to use - Needs expertise

Focus on J&P, tap into BE, understand RC

6. CUSTOMER CONSTRAINTS

What constraints prevent your customers from taking action or limit their choices of solutions?

Limited data analysis skills

Lack of access to advanced tools

Internet connectivity issues in rural areas

High cost of premium tools

Time constraints and lack of technical knowledge

Dependence on traditional methods and experience

7. BEHAVIOUR

What does your customer do to address the problem and get the job done?

*i.e. directly related: find the right solar panel installer, calculate usage and benefits;
indirectly associated: customers spend free time on volunteering work (i.e. Greenpeace)*

Collect data from government sources and local records.

Compare yield and area of different crops and regions.

Discuss with experts, extension officers and fellow farmers.

Use mobile apps or websites to check crop information.

Make decisions on crop planning, sowing and resource use.

Extract online & offline CH of BE

8. CHANNELS of BEHAVIOUR

8.1 ONLINE

What kind of actions do customers take online?

Extract online channels from #7

Government portals (data.gov.in, eNAM)

Agriculture websites and dashboards

YouTube, Webinars and Online Courses

Social Media Groups (WhatsApp, Telegram, Facebook)

8.2 OFFLINE

What kind of actions do customers take offline?

Extract offline channels from #7

Visit Agricultural offices and KVKs

Attend Training programs and Workshops

Consult Local Experts and Extension Officers

Field Visits and Farmer Meetings

TR SL CH

9. PROBLEM ROOT CAUSE

What is the real reason that this problem exists?
What is the back story behind the need to do this job?

Fragmented and unorganized data across sources.

Lack of simple tools to analyze agricultural data.

Low digital literacy and limited technical knowledge.

Variability in climate, soil and farming practices.

Need for better planning to ensure food security and farmer income.

10. YOUR SOLUTION

India's Agricultural Crop Production Analysis – A comprehensive data analysis platform that collects, cleans, analyzes and visualizes crop production data across India. It provides interactive dashboards, trend analysis, yield comparison, top state/district insights, seasonal patterns and future forecasts to help farmers, researchers, policymakers and businesses make data-driven decisions for improved productivity and sustainable agriculture.

Purpose / Vision

To empower stakeholders with data-driven insights for improving India's agricultural productivity, sustainability and food security.

“ Data today,
Better harvest tomorrow. ”
