

Project Design Phase Proposed Solution Template

Date	15 February 2025
Team ID	AI-ML-25-07
Project Name	India's Agricultural Crop Production Analysis
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Lack of comprehensive and easily accessible analysis of crop production trends across India leads to informed decision-making challenges for farmers, policymakers, researchers, and businesses.
2.	Idea / Solution description	Develop a data-driven analytical platform that collects, processes, and visualizes crop production data across states and years to identify trends, patterns, and factors affecting productivity.
3.	Novelty / Uniqueness	Integration of multi-source agricultural data with interactive dashboards, AI-based insights for yield prediction, and state-wise comparative analysis in one unified platform.
4.	Social Impact / Customer Satisfaction	Empowers farmers with data-backed insights, helps policymakers in planning, supports researchers and agribusinesses, and contributes to food security and sustainable agriculture.
5.	Business Model (Revenue Model)	Freemium model – Basic analytics free for farmers and students; premium advanced analytics, custom reports, and API access for businesses, research institutions, and government agencies.
6.	Scalability of the Solution	The platform is cloud-based and modular, allowing easy integration of new datasets, additional features (e.g., weather, soil data), and expansion to include more crops, markets, and forecasts.
