

Ideation Phase

Define the Problem Statements

Date	31 January 2025
Team ID	Team A-AgrilInsights
Project Name	India's Agricultural Crop Production Analysis
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe customer with 3–4 key characteristics: who are they?	I am a farmer / agricultural analyst / policymaker in India who relies on crop production data for decision-making.
I'm trying to	List their outcome or "job"—the one they trying to achieve.	I'm trying to analyze crop production trends across states, seasons, and years to improve planning, productivity, and resource allocation.
but	Describe what problems or barriers stand in the way – what aren't they?	but the data is scattered across multiple sources, inconsistent in format, lacks real-time insights, and is hard to visualize for meaningful analysis.
because	Enter the "root cause" of why the problem or barrier exists – what needs to be solved?	because there is a lack of a unified, reliable, and easy-to-use platform for comprehensive crop production analysis in India.
which makes me feel	Describe the emotions from the customer's point of view – how does it impact them emotionally?	which makes me feel frustrated, uncertain, and worried about making the right decisions that affect yield, income, and food security.

Example:

I am	I'm trying to	but	because	which makes me feel
a traveler	book flights on my phone	it takes a long time	the website is not responsive and doesn't have a mobile version	Frustrated

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	an Indian farmer	understand which crops perform best in my region across different seasons	I don't have access to accurate, up-to-date, and easily comparable crop production data	data is available in different formats, sources, and is not easy to analyze	frustrated and unsure about choosing the right crops for better yield and income
PS-2	a policymaker / researcher	identify crop production trends to make evidence-based decisions	it is difficult to visualize trends and compare performance across states	current reports and datasets lack interactive tools and clear insights	concerned about inefficient planning and its impact on food security
