

Ideation Phase

Empathize & Discover

Date	31 January 2025
Team ID	AGRI-ANALYTICS-01
Project Name	India's Agricultural Crop Production Analysis
Maximum Marks	4 Marks

Empathy Map Canvas:

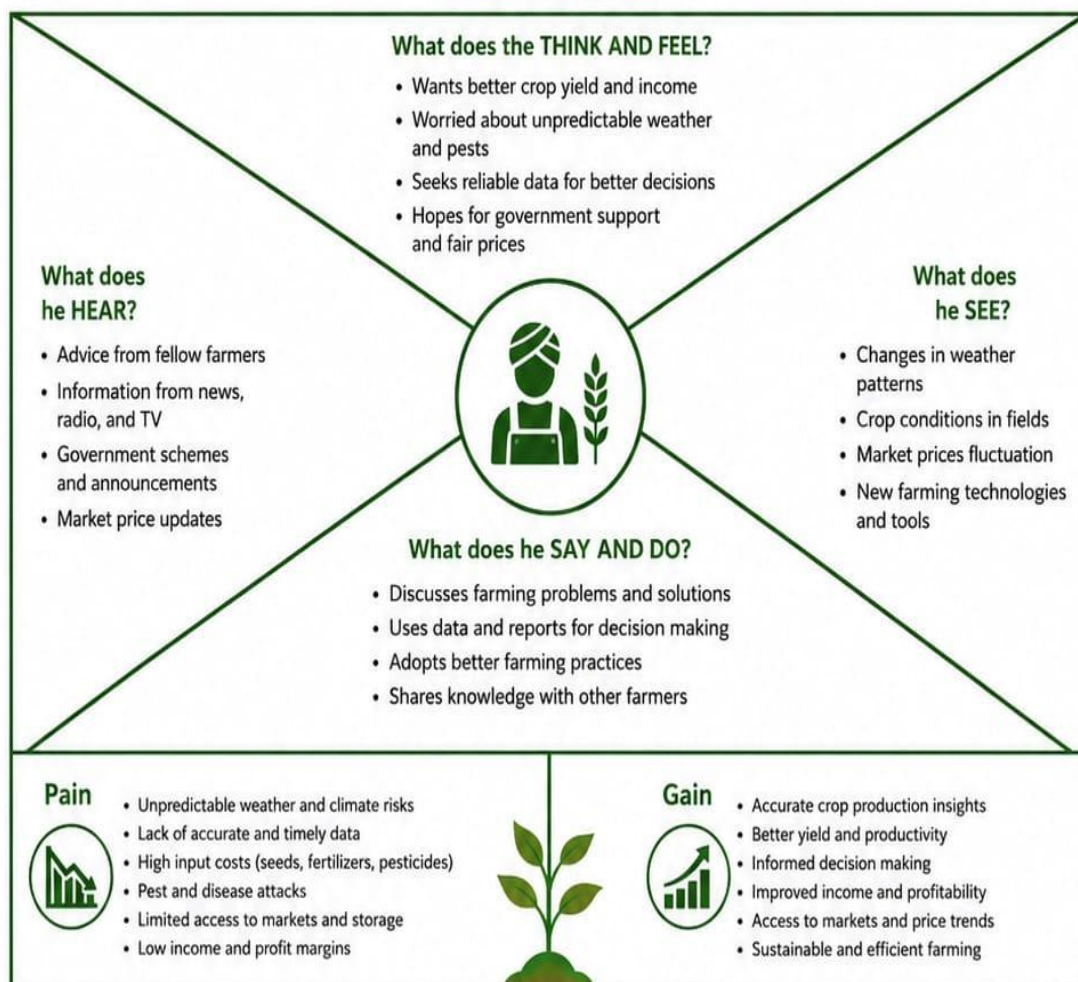

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to help teams better understand their users.

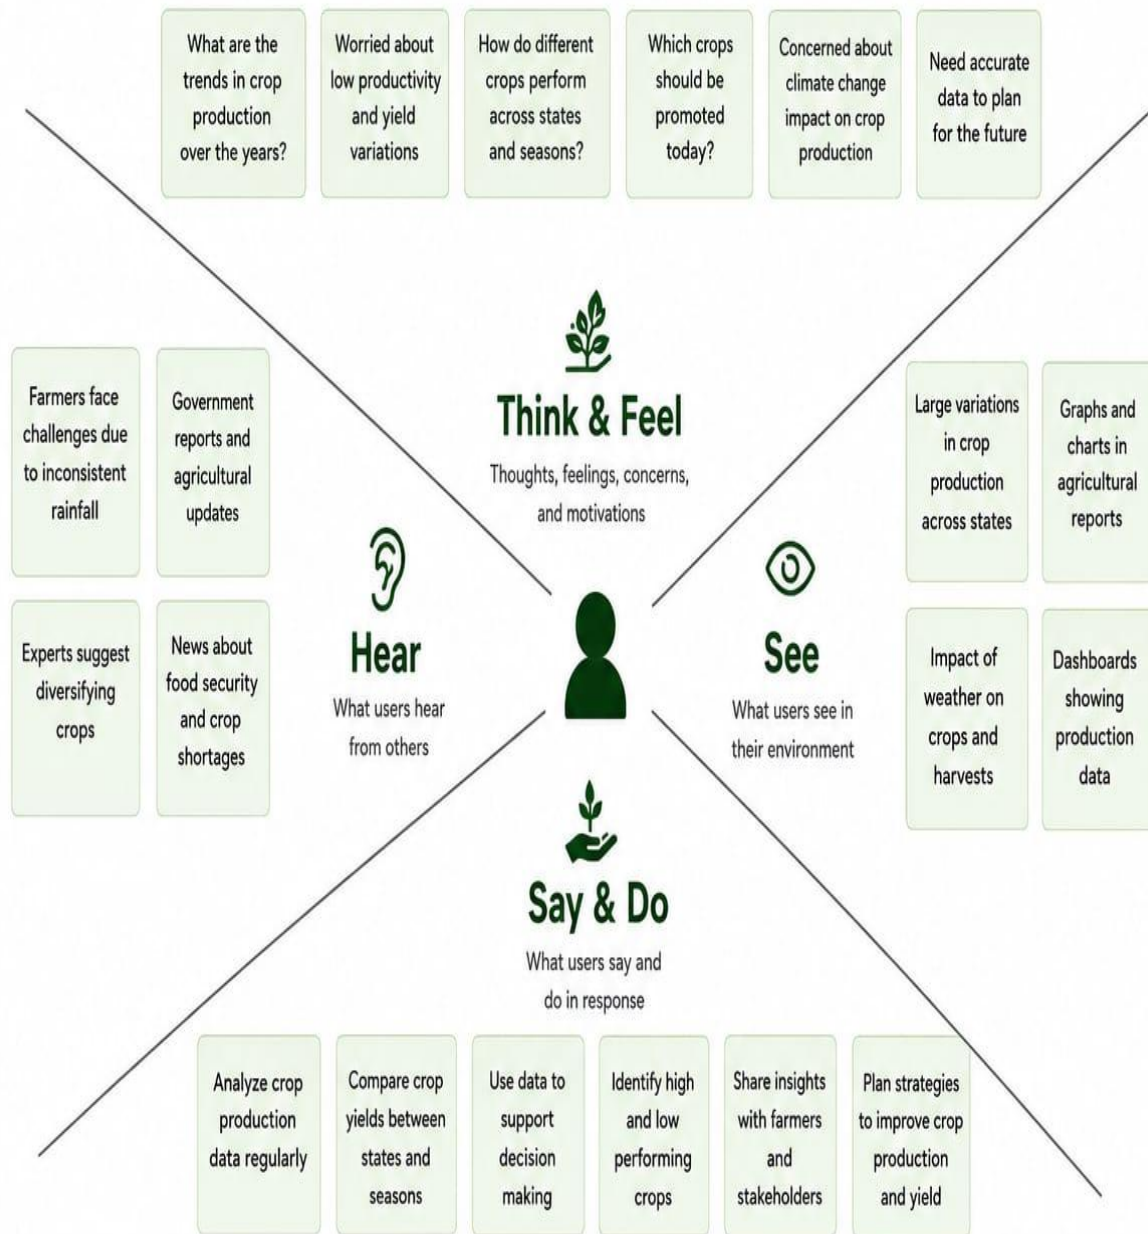

Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Example:

Empathy Map

Project: India's Agricultural Crop Production Analysis

Pain

Data from different sources is hard to collect and combine

Inconsistent and incomplete data across states

Hard to analyze large datasets manually

Lack of real-time data for timely decisions

Limited awareness of better performing crops and practices

Difficulty in predicting future crop production accurately

Gain

Easy access to accurate and reliable crop production data

Clear insights through visualizations and reports

Identify top performing crops and regions

Support better decision making for farmers and policymakers

Improve food security and resource planning

Track trends and predict future crop production effectively
